Professional Summary

2026 B.Tech CSE (AI) graduate, CGPA 8/10, targeting Java backend roles. Builds Spring Boot REST APIs with Spring Security (JWT), Spring Data JPA and PostgreSQL. The banking project handles concurrent transfers with row-level locks and has 60+ JUnit and Mockito tests. Also built a live voice AI app and JobTrack (React, Spring Boot). 1,300+ DSA problems solved, mostly in Java. Targeting Java Developer, Java Backend Developer and Associate Software Engineer roles.

Technical Skills

Languages: Java 21 (primary), SQL, Python, JavaScript, TypeScript
Core Java & CS: OOP, Collections Framework, Exception Handling, Multithreading, Data Structures & Algorithms, DBMS, Operating Systems
Backend: Spring Framework, Spring Boot, Spring MVC, Spring Security (JWT), Spring Data JPA, Hibernate, JDBC/JdbcTemplate, REST APIs, Swagger/OpenAPI, Flyway
Databases: PostgreSQL, MySQL, SQLite, Redis
Testing: JUnit 5, Mockito, pytest
Tools & Deployment: Git, GitHub, Maven, Docker, Docker Compose, Postman, IntelliJ IDEA, Render, Vercel, Neon
Also used: React, HTML5, CSS3, FastAPI, Spring AI, LangGraph
Soft Skills: Problem solving, debugging, team leadership (led the final-year capstone team), self-directed learning

Projects

Banking System (Spring Boot REST API) *2026*
Java 21, Spring Boot, Spring Security, Spring Data JPA, JdbcTemplate, PostgreSQL, Redis, Flyway
GitHub

- REST backend covering registration, login, accounts, deposits, withdrawals, transfers and transaction history. Code is split into controller, service and repository layers; Spring Security handles JWT authentication and Swagger/OpenAPI documents the endpoints.
- Two transfers hitting the same account at once can cause lost updates or deadlocks. Handled with pessimistic row locks (`SELECT ... FOR UPDATE`, with a lock timeout), a fixed lock order, and `CHECK` constraints in the database.
- Data access through both Spring Data JPA and JdbcTemplate on PostgreSQL. Flyway runs the migrations; Redis caching and Bucket4j rate limiting sit in front. 60+ JUnit 5 and Mockito tests.

VoxFlow (Voice AI and Interview Assistant) *2026*
Java 21, Spring Boot, Spring Security, PostgreSQL, React, Gemini API, AssemblyAI, ElevenLabs
GitHub | Live Demo

- Spring Boot API, deployed on Render, that coordinates three external services for a voice assistant: AssemblyAI for speech-to-text, Gemini for the reply and ElevenLabs for text-to-speech. A React client on Vercel records the audio.
- JWT login with Spring Security; profiles and conversation history are stored in PostgreSQL on Neon through Spring Data JPA.
- Interview-practice mode: the user answers aloud, the LLM scores the answer from 0 to 10, and analytics endpoints report the results.

AI-Crew (Multi-Agent Platform with Human Approval) *2026*
Spring Boot, Java, Python, FastAPI, LangGraph, PostgreSQL, Docker Compose, React, TypeScript
GitHub | Demo Video

- Backend for an AI agent platform: a Spring Boot REST API and a FastAPI + LangGraph service share a PostgreSQL database and start together with Docker Compose. A React/TypeScript UI sits on top.
- Five role-based agents return validated actions. Spring Boot executes the approved ones and logs each in an audit table with its own Audit page. Works with any OpenAI-compatible LLM (tested with Gemini).

JobTrack (Job Application Tracker) *2026*
React, TypeScript, Vite, Java 21, Spring Boot, PostgreSQL
GitHub | Live Demo

- Tracker for job applications with user registration and login. React + TypeScript (Vite) on the front, a Java 21 Spring Boot REST API and PostgreSQL behind it.
- Hosted as three services: frontend on Vercel, API on Render, database on Neon.

Education

B.Tech, Computer Science and Engineering (Artificial Intelligence) *Dec 2022 – Jul 2026*
Pranveer Singh Institute of Technology, Kanpur (AKTU, Lucknow). CGPA: 8/10
Class XII (CBSE) 65% | Class X (CBSE) 85%, Welfare Mission International School, Kanpur *2019 – 2022*

Certifications

Agentic AI Engineering with LangChain & LangGraph, Eden Marco (Udemy), 20.5 hrs | Verify *Oct 2026*
Java Spring Framework, Spring Boot, Spring AI, Telusko / Navin Reddy (Udemy), 55 hrs | Verify *Sep 2026*

Achievements

- Solved 1,300+ DSA problems, mostly in Java; working through Striver's 450 Sheet.
- LeetCode | GeeksforGeeks | HackerRank | CodeChef | Naukri Code360
