Professional Summary

2026 B.Tech Computer Science and Engineering (AI) graduate (CGPA 8/10) seeking a **Software Developer / Associate Software Developer** role. Strong in data structures and algorithms (1,300+ problems solved), OOP, DBMS, and operating systems, with hands-on experience building, testing, and deploying backend, full-stack, and computer-vision applications in Java, Python, and JavaScript, using Git, Docker, REST APIs, and SQL databases.

Education

Bachelor of Technology, Computer Science and Engineering (Artificial Intelligence) *Dec 2022 – Jul 2026*
Pranveer Singh Institute of Technology, Kanpur, India (affiliated with AKTU, Lucknow) — CGPA: 8/10.00

Class XII (CBSE) 65% | **Class X (CBSE) 85%** | **Welfare Mission International School, Kanpur** *2019 – 2022*

Technical Skills

Languages: Java 21, Python, JavaScript, TypeScript, SQL, C++, C
Core CS: Data Structures & Algorithms, OOP, Collections, Multithreading, Exception Handling, DBMS, Operating Systems
Frameworks: Spring Boot, Spring Security (JWT), Spring Data JPA, Hibernate, REST APIs, React, Flask, FastAPI
Databases: PostgreSQL, MySQL, SQLite, Redis
Testing & Tools: JUnit 5, Mockito, pytest, Maven, Git, GitHub, Docker, Docker Compose, Postman, Swagger/OpenAPI, IntelliJ IDEA, VS Code, Render, Vercel, Neon
Also familiar with: Spring AI, LangChain/LangGraph, LLM APIs (Gemini, OpenAI), OpenCV

Projects

VoxFlow — Context-Aware Voice AI & Interview Assistant *2026*
React, Java 21, Spring Boot, Spring Security (JWT), PostgreSQL, Gemini API, AssemblyAI, ElevenLabs
GitHub Repository | Live Demo

- Built and deployed a full-stack voice AI app: a React client (Vercel) records speech; a Spring Boot API (Render) orchestrates speech-to-text (AssemblyAI), an LLM (Gemini), and text-to-speech (ElevenLabs); PostgreSQL on Neon.
- Implemented JWT authentication with Spring Security and persisted user profiles and conversation history in PostgreSQL via Spring Data JPA.
- Developed a Java interview-practice mode with spoken answers, LLM-based scoring (0–10), and analytics endpoints.

Banking System — Spring Boot REST API *2026*
Java, Spring Boot, Spring Security (JWT), Spring Data JPA, JdbcTemplate, PostgreSQL, Redis, Flyway, JUnit 5, Mockito
GitHub Repository

- Built a layered (controller–service–repository) REST backend for authentication, accounts, deposits, withdrawals, transfers, and transaction history, secured with Spring Security and JWT and documented with Swagger/OpenAPI.
- Prevented lost updates and deadlocks in concurrent transfers with pessimistic row locks (`SELECT ... FOR UPDATE`, lock timeout) and consistent lock ordering, backed by database `CHECK` constraints.
- Added JPA and JdbcTemplate persistence, Flyway migrations, Redis caching, Bucket4j rate limiting, and 60+ JUnit 5/Mockito tests.

AI-Crew — Human-in-the-Loop Multi-Agent Platform *2026*
React, TypeScript, Java, Spring Boot, Python, FastAPI, LangGraph, PostgreSQL, Docker Compose
GitHub Repository

- Built a Docker Compose platform (React/TypeScript, Spring Boot, FastAPI + LangGraph, PostgreSQL) where five role-based AI agents propose validated actions that a user must approve before Spring Boot executes and audits them.
- Works with any OpenAI-compatible LLM (tested with Gemini) and falls back to an offline mode if the provider fails; covered by pytest tests.

ATTEND AI — Smart Attendance System (Face Recognition) *2025 – 2026*
Python, Flask, OpenCV, face_recognition, dlib, SQLAlchemy, PostgreSQL/SQLite, Docker
GitHub Repository | Live Demo

- Led a team on the final-year capstone: browser-camera face recognition with admin login, student enrollment, duplicate-attendance prevention, dashboard, and CSV export; deployed a live demo.

Certifications

Java Spring Framework, Spring Boot, Spring AI (Telusko / Navin Reddy, Udemy), 55 hrs | **Verify** *Sep 2026*
Agentic AI Engineering with LangChain & LangGraph (Eden Marco, Udemy), 20.5 hrs | **Verify** *Oct 2026*

Coding Profiles

1,300+ DSA problems solved: LeetCode | GeeksforGeeks | HackerRank | CodeChef | Naukri Code360
