Professional Summary

Final-year B.Tech Computer Science and Engineering (Artificial Intelligence) student with a CGPA of 8/10, seeking a **Software Engineer / Java Full Stack Developer** role. Skilled in backend development with Java, Spring Boot, Spring Data JPA, RESTful APIs, and PostgreSQL, and full-stack web development with React, JavaScript, HTML/CSS, and MVC architecture. Led a team on a facial-recognition-based attendance management system as a final-year capstone project, with a strong foundation in data structures, algorithms, and object-oriented programming (OOP).

Education

Bachelor of Technology, Computer Science and Engineering (Artificial Intelligence) Dec 2022 – Jul 2026
Pranveer Singh Institute of Technology, Kanpur, India (affiliated with AKTU, Lucknow) — CGPA: 8/10.00

Senior Secondary (Class XII), CBSE 2021 – 2022
Welfare Mission International School, Kanpur, India — Aggregate: 62.4%

Technical Skills

Languages: Java 21, Python, C++, SQL, JavaScript

Frontend: React, HTML5, CSS3

Backend: Spring Boot, Spring, Spring AI, Flask, Node.js, REST APIs, JDBC, JdbcTemplate

Databases: PostgreSQL, MySQL, SQLite

Core CS: Data Structures & Algorithms, OOP, Collections, Exception Handling, Multithreading, Operating Systems, DBMS

Tools: Git, GitHub, VS Code, IntelliJ IDEA, Postman

AI Tools: ChatGPT (prompt engineering, AI-assisted development)

Projects

ATTEND AI — Smart Attendance System (Face Recognition) 2025 – 2026
Python, Flask, OpenCV, face_recognition, dlib, NumPy, SQLite, SQLAlchemy
[GitHub Repository](#) | [Live Demo](#)

- Led a team as project lead to develop a facial-recognition-based attendance management system as the final-year capstone project.
- Engineered real-time face detection and recognition using OpenCV, building a login system, lecture scheduling, and a matrix-style attendance dashboard.
- Corrected the face encoding pipeline using OpenCV's Haar Cascade with explicit known_face_locations, and resolved a broken dlib wheel by upgrading to dlib 20.0.0.
- Automated attendance logging with timestamps and generated attendance records.

Banking System — Spring Boot REST API 2025 – 2026
Java, Spring Boot, PostgreSQL, Spring Data JPA, JDBC/JdbcTemplate
[GitHub Repository](#)

- Built a backend banking system using MVC architecture, supporting authentication, account management, deposits, withdrawals, transfers, and transaction tracking.
- Implemented Spring Data JPA and JDBC/JdbcTemplate for CRUD operations and transaction reporting on PostgreSQL.
- Implemented exception handling, transaction management, and concurrency control, plus asynchronous report processing using thread pools.

MyMeal — Food Ordering Web Application 2024 – 2025
Flask, JavaScript, HTML, CSS
[GitHub Repository](#) | [Live Demo](#)

- Built a full-stack food ordering platform with CRUD-based menu browsing, cart management, and order placement.
- Designed a session-based cart system without a database for lightweight order simulation.

AI Voice Assistant Bot 2026
React, Speech-to-Text / Text-to-Speech API integration

- Building and optimizing a live, browser-based voice assistant that integrates a speech-to-text/TTS API for real-time voice interaction.

Certifications

Java Spring Framework, Spring Boot, Spring AI — Gen AI (Telusko / Navin Reddy, Udemy) Sep 2026
55 hours | Certificate ID: UC-146bd6a6-6729-4224-85a1-d5fa78e8cc07 | [Verify](#)
